Art Unit 1713

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. § 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-9 and 14 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Lim et al., U.S. Patent 5,320,669 or Suominen.

Each of these patents shows compositions which are biodegradable and have incorporated therein the instantly claimed polymers and cereal grain flours. See specifically Lim in the Abstract as well as column 7 lines 20+ and the Examples. Suominen shows the claimed polymers in column 6 and the cereal grain flour is shown at column 6 lines 30+. In view of this disclosure, applicants' claims are not novel.

In the event that one of ordinary skill in the art would not immediately envisage each of applicants' instantly claimed ingredients and/or properties associated therewith, then the invention is seen to be prima facie obvious from the art cited. Each of the cited patents shows the claimed ingredients and teaches one of ordinary skill in the art that they may be used in combination with one another. The Examiner maintains that one of ordinary skill in the art would find it prima facie obvious to mix the ingredients as claimed and as such, the claims are unpatentable.

Claim 8 contains the trademark/trade name Biopol and others. Where a trademark or trade name is used in a claim as a limitation to identify or describe a particular material or product, the claim does not comply with the requirements of 35 U.S.C. § 112, second paragraph. See *Ex parte Simpson*, 218 USPQ 1020 (Bd. App. 1982). The claim scope is uncertain since the trademark or trade name cannot be used properly to identify any particular material or product. A trademark or trade name is used to identify a source of goods, and not the goods themselves. Thus, a trademark or trade name does not identify or describe the goods associated with the trademark or trade name. In the present case, the trademark/trade name is used to identify/describe the biodegradable polymer and, accordingly, the identification/description is indefinite.

Art Unit 1713

Applicant's election with traverse of Group I in Paper No. 6 is acknowledged. The traversal is on the ground(s) that all claims depend from claim 1. This is not found persuasive because the claims are patentably distinct for the reasons as set forth in the restriction requirement and the fact that they depend from claim 1 does not mean that they are not independent or distinct inventions.

The requirement is still deemed proper and is therefore made FINAL.
